

At-Risk in the ED

CLINICAL TRAINING SIMULATION

An interactive role-play simulation for emergency department (“ED”) personnel that builds their skills to screen patients for substance use, mental health disorders, and suicide risk, collaboratively discuss treatment plans using motivational interviewing techniques, and refer patients to obtain further support.

TOPICS

Integrating behavioral health in acute care

USERS

Nurses, physicians, and students

SETTINGS

Healthcare, schools of health professions

DURATION

60
minutes

Adopted by state agencies, hospital networks, and schools of health professions, this research-proven, online, and CE-certified solution helps improve the capacity of ED practitioners to address substance use, mental health, and suicidal ideation as part of routine patient care.

BUILD REAL-LIFE SKILLS IN A VIRTUAL CLINIC

Assume the role of a health professional and talk with three virtual patients about their substance use and mental health disorders. Try different approaches to see what works best.

Harnessing the power of conversation to improve the quality of substance use and mental health Screening and Brief Intervention.

Mental health and substance use often contribute to patients' visits to the emergency department ("ED"). Almost half of individuals who die by suicide were seen in an ED in the year prior, and alcohol-related injuries account for up to a quarter of ED visits. Addressing behavioral health as part of acute care can improve patients' health and reduce ED utilization.

LEARNING OBJECTIVES

- Screen patients using evidence-based tools
- Recognize risk factors and warning signs of alcohol/substance use, mental health disorders, and suicidal ideation
- Discuss treatment options and engage in collaborative treatment planning with patients
- Apply motivational interviewing techniques to improve communication and outcomes
- Coordinate referrals to treatment or follow-up care

FEATURES

- Fully-hosted solution deployed to users in less than one week
- Technical assistance and outreach templates to drive adoption
- Usage reports and customizable online surveys to support program evaluation
- Access to validated screening tools and a customizable list of local referral resources
- Certified for 1.50 CME AMA PRA Category 1 Credits™ and 1.50 ANCC CNE contact hours

RESEARCH PROVEN

A longitudinal study with 75 health professionals shows statistically significant and sustained increases in participants' preparedness and self-efficacy to identify and intervene with patients who are at-risk for substance use and suicide. To learn more, please visit kognito.com/research.

HOW TO BUY

Organizations can purchase yearly subscriptions to the simulation that include hosting, technical assistance, program evaluation, and usage reports. For details, contact sales@kognito.com or **212.675.9234**. To purchase 1–50 individual licenses, please visit store.kognito.com.
