

Kognito is a company dedicated to measurably improving social, emotional, and physical health. Kognito simulations have been lauded as an innovative approach to training, moving from compliance and knowledge acquisition to attitudinal and behavioral change through social and emotional engagement.

In recognition of the profound impact of improving conversation skills and response to the demand from higher education stakeholders across the country, Kognito is excited to announce the creation of the Diversity, Equity, and Inclusion (DEI) Advisory Group for Higher Education to assist in the development of an upcoming DEI product.

This product will use Kognito’s practice scenarios to cultivate inclusive campus environments where faculty, staff, and students feel seen, heard, valued, and affirmed. The DEI Advisory Group will provide their thought leadership from a diverse set of experiences and knowledge base to shape the direction, learning goals, and practice scenarios in the product development process. Through open dialogue, active listening, and receptivity to continual learning, we hope that this product will support DEI work to create a sense of belonging for all on campuses across the country.
