

At-Risk for Early Childhood Educators

At-Risk for Early Childhood Educators is an interactive role-play simulation for educators who work with young children that builds understanding, knowledge, and skills in mental health and behavior management.

Learning Objectives

- ✓ Identify signs that a young child in your care might need emotional support
- ✓ Intervene appropriately in response to behavioral challenges or social emotional skills deficits
- ✓ Bring up concerns with a caregiver and collaborate on a plan
- ✓ Practice emotional self-regulation to be better prepared to support your classroom

Learners interact with Virtual Humans through interactive conversations

Market
PK-12

Audience
Educator

Topic
Mental Health & Well-being, Resiliency & Growth Mindset, SEL

Duration
45 Minutes

Overview

Preschoolers are more likely to be expelled than children in any other grade. When they exhibit disruptive behavior, early childhood educators are key to early identification that leads to the additional support they need. Helping young children regulate their emotions and building relationships with their caregivers are crucial components of lifelong well-being and success.

At-Risk for Early Childhood Educators equips preschool teachers with communication skills to help students ages 3-5 who need more support. Through interactive role-play scenarios, teachers practice managing disruptive behavior in the classroom, talking one-on-one with a student, engaging with caregivers, and exercising self-regulation. School administrators can track usage and measure changes in attitudes and behavior among their staff. Users have access to customized national, local, and school-specific resources in addition to simulation content.

Features

- ✓ Fully-hosted solution deployed to users in less than one week
- ✓ Technical assistance and outreach templates to drive adoption
- ✓ Usage reports and customizable online surveys to support program evaluation
- ✓ Customizable list of local and national mental health resources
- ✓ Discussion guides to support blended delivery with in-person workshops

“The scenarios are what teachers and caregivers experience every day. I felt that I was dealing with a real issue.”

- Teacher, provided by Minnesota Dept. of Health
